ISO 9001:2015 ISO 14001:2015

PROCESSING MACHINES FOR FOOD, MEDICINE, HERB AND CHEMICAL

HI-YIELD SPRAY DRYER

SDE-2

Use for transforming liquid product to be powder. Water evaporates at 1-2 liters/hour. Suitable for education and research in university, college, government and private section.

SDE-10

Use for transforming liquid product to be powder. Water evaporates at 10 liters/hour. Suitable for education and research in university and college.

SDE-50

Use for transforming liquid product to be powder. Water evaporates at 50 liters/hour. Suitable for food and medicine SMEs.

SDE-150

Use for transforming liquid product to be powder. Water evaporates at 150 liters/hour. With technology from Europe, it is suitable for large industry.

SDG-500 NF

Use for transforming liquid product to be powder. Water evaporates at 500 liters/hour. With technology from Europe, it is suitable for large industry.

HI-NUTRITION EVAPORATOR

VPF-10/1F

Use for transforming diluted liquid to be concentrated liquid. Water evaporates at 10 liters/hour at temperature 50°C. Suitable for education and research in university and college.

VPF-30/1F

Use for transforming diluted liquid to be concentrated liquid. Water evaporates at 30 liters/hour at temperature 50°C. Suitable for food and medicine SMEs.

VPF-100/1F

Use for transforming diluted liquid to be concentrated liquid. Water evaporates at 100 liters/hour at temperature 50°C. Suitable for food and medicine SMEs.

VPF-300/2F

Use for transforming diluted liquid to be concentrated liquid. Water evaporates at 300 liters/hour at temperature 50°C. With high efficiency technology from Europe, it is suitable for large industry.

VPF-1500/2F

Use for transforming diluted liquid to be concentrated liquid. Water evaporates at 1500 liters/hour at temperature 50°C. With high efficiency technology from Europe, it is suitable for large industry.

ALCOHOL EVAPORATOR&RECOVERY

- Use for distilling alcohol solution to recycle. Alcohol evaporates at 25/50/100 liters/hour. Suitable for herbs and foods industry.

ROTARY EVAPORATOR SET

- Use for evaporating water or alcohol out to produce concentrated liquid and condense water or alcohol for recycling.

HI-SPEED EXTRACTOR

- Use for extracting active ingredient to become extract with 3-5 times faster than using conventional extractor. Can contain raw material for 10/20/45 liters at a time. Suitable for herbs and foods industry.

FLUIDIZED BED GRANULATOR

- Use for producing high water-soluble powdered product.

ESSENTIAL OIL DISTILLER

- Use for distilling the essential oil from herbs such as Plai, Lemongrass, Kaffir Lime, Lime peel etc.

COLD OIL SCREW PRESS MACHINE

- Use for pressing the oil from raw material by cold or low heat.

LINGZHI HERB CHIPPER

- Use for chipping hard and stiff vegetable or herbs.

BRANCH HERB CHIPPER

- Use for chipping branched vegetables and herbs to small chips.

STEAM BOILER

- Use for producing steam, which used for heating other equipment.

SUPERHEATED STEAM DRYER

- Use for drying several raw materials which can be preserved the quality, color, odor, and taste of food.

ROTARY TRAY DRYER

- Drying oven with 25 trays and 1 door.
- Use for drying several raw materials such as food, herb. Including heating system by electricity or Liquefied Petroleum Gas (LPG).

FREEZE DRYER

- Use for sublimating water from raw material at low temperature, which can preserve all nutrients and extend product shelf life.

HOMOGENIZER

- Use for disintegrating lipid particle to become small particle and be homogeneous.

DATA LOGGER

COLLOID MILL

- Use for disintegrating lipid particle to become small particle and be homogeneous.

MULTI FUNCTION CUTTING MACHINE

- Use for cutting fruit and vegetable into various shape such as thin chip, strip and cube. Suitable for all types of fruit and vegetable.

CUBIC MIXER

- Use for mixing dry powdered material, use only 20 minutes for mixing together.

VIBRO SEPARATOR & FILTER

- Use for filtering precipitate out from liquid or separating sizes of powder which can change the mesh size of the sieve.

CAPSULE FILLING MACHINE

- Use for filling powder into various sizes of capsule.

TABLET FILLING PACKING MACHINE

- Use for filling milk tablets into package.

CAPSULE BLISTER PACKING MACHINE

- Use for forming blister pack, filling capsule into the pack, sealing and cutting the blister pack automatically.

TABLET COUNTING AND FILLING MACHINE

- Use for counting and containing capsules or tablets into the bottle semi-automatically.

CAPSULE POLISHING AND SORTING MACHINE

- Use for polishing the capsule and sorting the defective capsules out automatically.

SCREW PRESS JUICER

- Use for squeezing raw material to obtain juice such as pineapple.

VACUUM FRYER

- Use for frying raw material at low temperature which can preserve vitamins and obtained product will not be greasy.

HEATING MIXING TANK/ REACTOR/ AGITATOR

- Use for mixing liquid to prevent precipitation and can heating at highest temperature about 100°C.

SCREW FEED CONVEYOR

- Use for conveying various types of raw materials.

MILK TANK

- Use for storing raw milk under 4 °C.

HERBS WASHING MACHINE

- Use for washing raw material such as herb fruit and vegetable.

TABLET PRESS MACHINE

- Use for pressing mixed powder to be tablet.

TABLET SORTING MACHINE

- Use for sorting defective or broken tablets out.

HOMOGENIZING MIXER

- Use for mixing and reducing lipid particle size to be homogeneous and cause emulsion.

POWDER PACKING MACHINE

Use for packing powdered raw material into package.

NITROGEN FILLING AND PACKING MACHINE

- Use for packing crispy snacks by filling nitrogen gas for preventing rancidity and expanding product shelf life.

DIAPHRAGM PUMP

- Use for pumping liquid. Made from food-graded stainless steel. Easily moving.

OIL FREE AIR COMPRESSOR

- Use for compressing air by oil free system for using with other machine.

CIP TANKS & PIPING SYSTEM

- Use for cleaning and sterilizing machine without unassembling the parts.

WATER SOFTENER & RO SYSTEM

- Use for filtering water to produce soft water and reverse osmosis (RO) water.

DIGITAL BALANCE SCALE

- Use for weighing raw material accurately.

HERBS WASHING MACHINE (BRUSH TYPE)

- Use for washing herbs, vegetables and fruits.

LIQUID FILLING MACHINE

- Use for filling liquid into package.

VIBRO SEPARATION TEST SIEVE

- Use for separating different sizes of powder.

BALL-SOCKET PRESS JUICER

- Use for pressing fruit to obtain juice.

HYDRAULIC PRESS JUICER

- Use for squeezing vegetable or fruit to obtain juice.

MULTIFUNCTION EVAPORATOR

HERB POWDER MAKING MACHINE

- Use for grinding herb to become fine powder.

BATCH PAN EVAPORATOR WITH AGITATOR

- Use for water evaporating to produce concentrated liquid.

ALCOHOL EXTRACT TANK FOR HERB OIL

- Use for alcohol extracting from herbs to obtain essential oil.

PIN MILL

- Use for milling no moisture, solid raw material such as sugar, herbs.

ROTATING DRUM DRYER

- Use for drying raw material such as tea leaf, Kratom leaf to eliminate moisture.

FITZ MILL OR HAMMER MILL

- Use for milling solid raw material such as herbs.

SUPERCRITICAL FLUID EXTRACTOR

- Use for extracting essential oil from herb such as cannabis oil.

PASTEURIZER (BATCH TYPE)

- Use for pasteurizing food products.

HOMO MIXER

- Use for mixing raw material to be homogeneous.

SPRAY DRYER (GLASS TYPE)

- Use for spray drying raw material to become powder.

RIBBON MIXER

- Use for mixing powdered raw material.

HANDHELD INKJET SUITCASE

MULTI-FUNCTION HERB EXTRACTOR

- Use for extracting herbal juice.

TEA PACKING MACHINE

- Use for packing tea leaves into tea bag.

MOISTURE ANALYZER

- Use for measuring moisture content or concentration of raw material and product.

MODIFIED ATMOSPHERE PACKING MACHINE (MAP)

- Use for packing food into package and modifying atmosphere to expand product shelf life.

REFRACTOMETER

- Use for measuring concentration of solution in the unit of %Brix.

SOLAR POWER AERATOR

- Use for generating air under the water by using propeller.

TABLET PRESS MACHINE (SINGLE PUNCH)

- Use for pressing powdered raw material to become tablets.

CAN SEAMER

- Use for seaming beverage cans.

VACUUM SEALER

- Use for sealing package to expand product shelf life.

FOOT SWITCH SEALER

- Use for sealing bag packaging.

TWIN DRUM DRYER

- Use for drying viscous-liquid raw material such as liquid starch.

NATURAL MATERIAL MOULDER

- Natural Material Moulder

AUTOMATIC TUBE FILLING MACHINE

SINGLE DRUM DRYER

VERTICAL VACUUM SEALER

- Use for sealing package.

CENTRIFUGAL GRANULATOR

- Use for granulating powder to be granule.

HORIZONTAL SEALER

- Use for sealing package.

PASTE FILLING MACHINE

- Use for filling liquid which need heating such as balm.

SWING GRANULATOR

- Use for grinding agglomerated powder to become granule.

VERTICAL TABLETS DEDUSTER

- Use for dedusting from tablets.

LIQUID FILLING MACHINE (TUBE TYPE)

- Use for filling liquid product into package.

EXTRUDING GRANULATING MACHINE

- Use for extruding powdered raw material to form pellet.

VERTICAL SEALER

- Use for sealing food such as liquid in vertical direction.

HERB OIL EXTRACTION MACHINE

- Use for extracting cannabis oil by using ethanol.

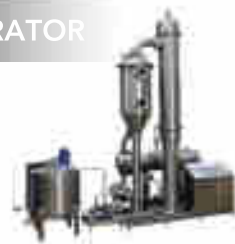

SPRAY DRYER WITH FLUIDIZED BED

- Use for making granule dry powder from liquid. Product will be water-soluble.

FORCED CIRCULATION EVAPORATOR

- Use for evaporating water out from raw material to become concentrated liquid product.

Awards Received

**“Best of the Best Technology Award”
and Technology and Equipment for Machinery Award
“Winner of Technology and Machinery for Manufacturing”
From Ministry of Science and Technology
In “TechnoMart & InnoMart 2007”**

**Honorary Award
“Entrepreneurs with Continuous Technology Development”
From Ministry of Science and Technology
In “TechnoMart & InnoMart 2012”**

**Machinery Technology Award 2015
“1st Runner-Up of Technology and Machinery for Energy,
Environment and Quality of Life Award”
In “National Science and Technology Fair 2015”**

**Best Technology Award
Machinery and equipment
Year 2021**

**Best Technology Award
Machinery and equipment
Year 2020**

**“Premium Product of Thailand 2016 Award”
From Ministry of Industry**

**SME Thailand Inno Awards 2017
in product innovation**

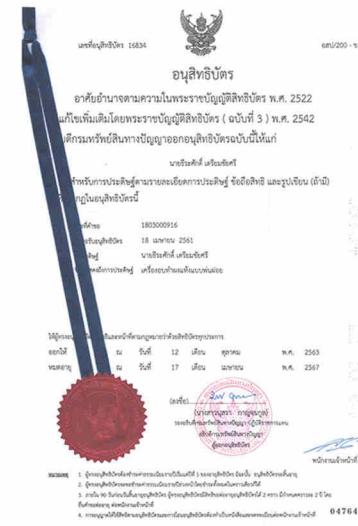

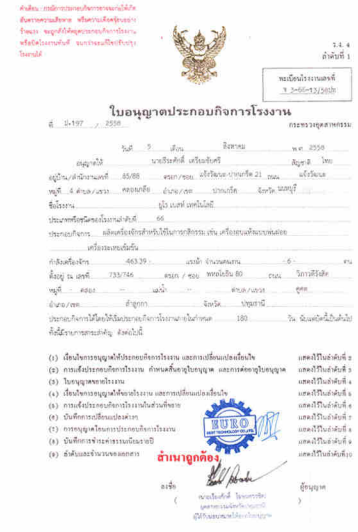

**“Standard SMEs Award”
From Ministry of Industry
In “8th SMEs National Awards 2016”**

**“The Prime Minister’s Small and Medium Industry Award 2020”
Innovative Technology Management
From Ministry of Industry**

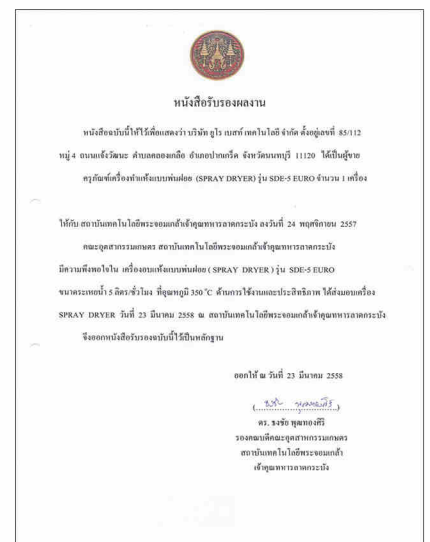

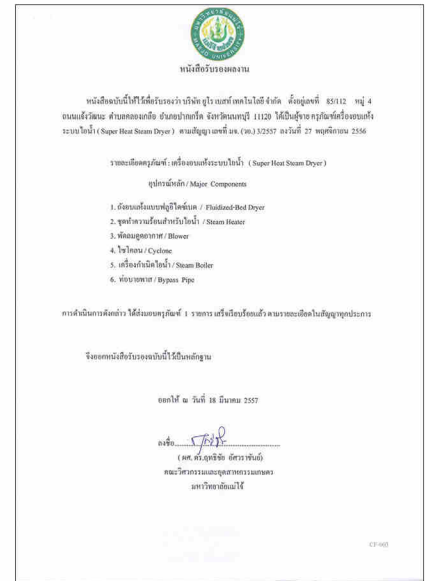

**Outstanding SMEs Award in the 9th
National SMEs Best Awards Contest**

Standard Certification

Some of Letter to Certify

Some of After-Sales Service

Repair Spray Dryer at Kasetsart Agricultural and Agro-Industrial Product Improvement Institute

Repair Capsule Packing Machine at Huaithapthan Hospital

Repair Evaporator, Spray dryer, Freeze dry at Phetchabun Rajabhat University

Repair Spray Dryer at Royal Chitralada Projects

Repair Fluidized Bed Granulator Nihomkhamsoi Hospital

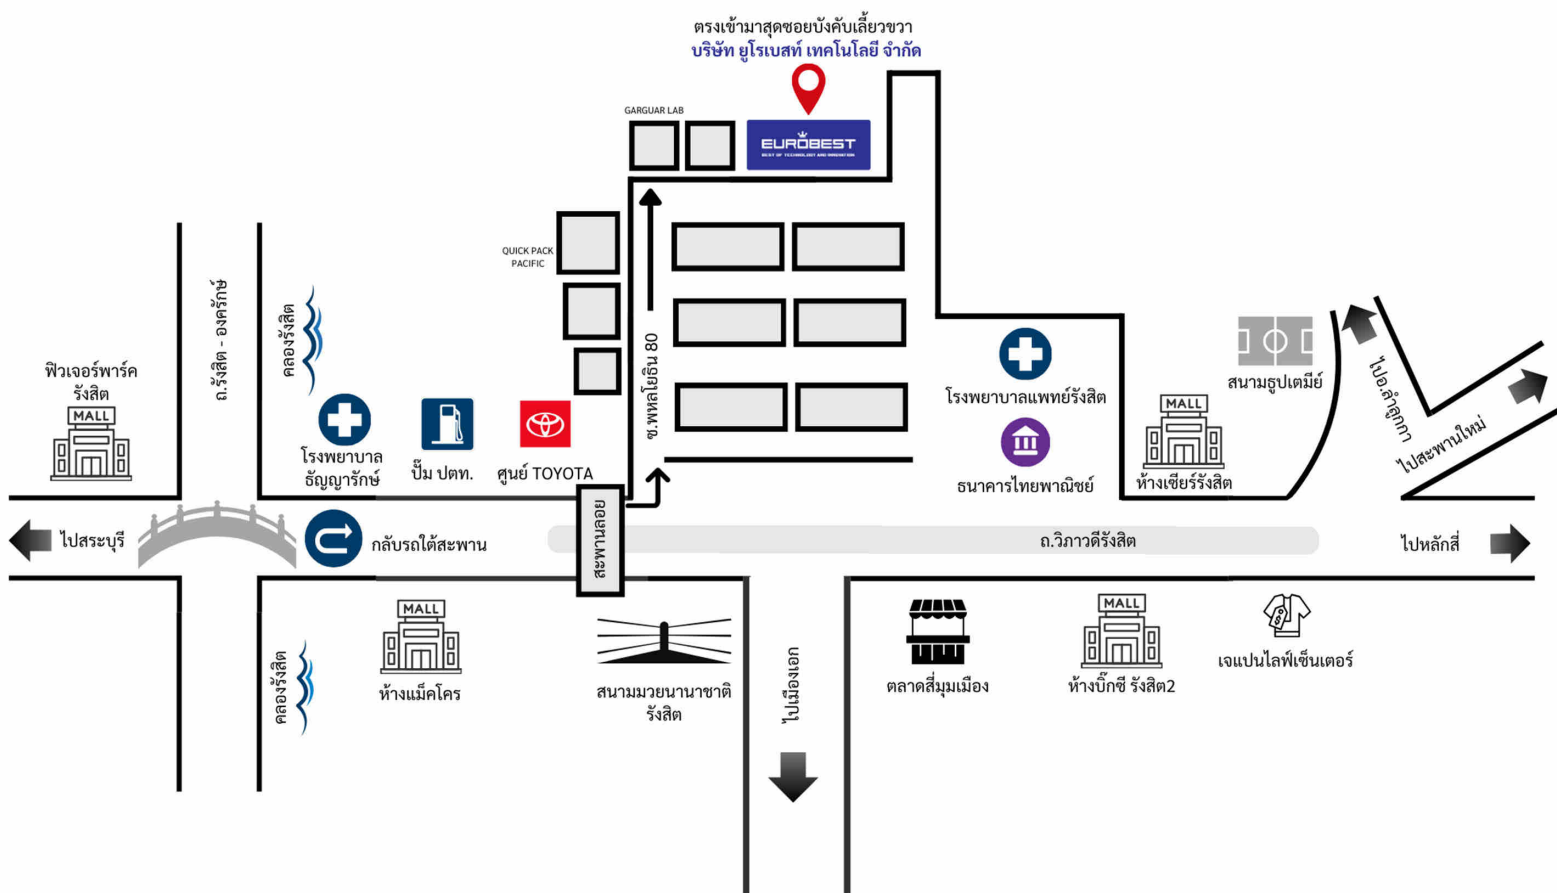

Repair TRAY DRYER at Government Pharmaceutical Organization

“With over 40 years of experience and expertise, we have continuously created and developed new technology for processing food, medicine and herbs. We have sample machines for you to visit and ready to test the actual production before making a purchase decision. We are the leading manufacturer and distributor of spray dryer and evaporator in Thailand. With excellent after-sales service and convenient to contact. Along with being a supporter of research machines of well-known universities and receiving the TMA Mark from the Thai Machinery Association.”
